# STONY PLAIN SUN.

VOLUME FIFTEEN

STONY PLAIN, ALBERTA, THURSDAY FEB 21, 1935

## ROYAL CAFE, STONY PLAIN.

(Phone 33)

Let Good Digestion Wait on Appetite, and The Royal Cafe Satisfy Both.

ICE CREAM Always on Hand—Phone in your orders and have them delivered.

FIRST-CLASS FURNISHED ROOMS TO RENT.

**L. M. LARSON, Proprietor.**

### The Scots of the Wheat Plant

The roots of the wheat plant usually penetrate into the soil for a depth of 5 to 6 feet with a great mass of rooting material. This marvellous root system completely exhausts all the moisture that the soil will give up to a depth of 5 or 6 feet by harvest time. The roots transform into what all the moisture and plant food that is available. It takes between 30 and 60 tons of water to make each bushel of wheat, or from 1,000 to 2,000 pounds of water for each pound of wheat. The yield is usually in proportion to the amount of moisture that falls and can be conserved in the soil. The University of Saskatchewan has dug up a wheat plant with all its roots. The Seale Grain Company has made a nice photograph of this plant and roots. One will be sent free to any person asking for it. Address: Research Department, Seale Grain Company, Winnipeg.

SEALE GRAIN COMPANY, LIMITED, WINNIPEG

## Egg and Poultry Producers.

A series of broadcasts dealing fully with the poultry marketing plan proposed for this province under the Natural Products Marketing Act will be given over Stations:

**C.F.C. Calgary**  
**C.J.C.A. Edmonton**

commencing at 9 p.m. each day on

**Saturday, Feb. 9**  
**Tuesday, Feb. 12**  
**Thursday, Feb. 14**

**Saturday, Feb. 16**  
**Monday, Feb. 18**  
**Thursday, Feb. 21**

Ballot of producers on the proposed Alberta marketing plan will be registered Feb. 16 to 23. Ask your postmaster for particulars.

**ALBERTA POULTRY MARKETING BOARD**  
206 Northern Investment Building, Edmonton

### Successful Poultrymen!

Are demanding the "Gillespie Feed" brand poultry and dairy feeds. Why? Because they are scientifically blended, machine mixed, contain the highest quality ingredients and produce the desired results.

### Poultry Marketing Plan.

A meeting in the interests of the proposed Alberta Poultry Marketing Plan was held in the town hall Saturday Evg., with about 60 people present. Mr W T Propp presided.

Among the speakers who had come out from the City to explain the plan were Mr J J Husford and Mr J H Rhodes.

It was explained that the purpose of the proposed Plan was to bring the marketing of the products of the poultry industry in this province under the operation of the Federal Natural Products Marketing Act; and to maintain a high standard of quality in the products of this industry.

A local branch for this district was formed, with the following on the committee—J H Lory, chairman—Mrs J J Ulmer, secretary; and Joe Heung J J Shoop, Mrs John Staub, Mrs P J Fischer.

### Quick Action.

Mr John Evjen has at present great admiration for Chief Shute's Edmonton brigade of sleuths. Mr Evjen had a parcel stolen from his car while in the City on Saturday. In about ten minutes after he reported the theft the parcel was handed him by an officer of the law. The young fellow who had committed the theft had tried to dispose of the article to a second-hand dealer, and the dealer had reported the matter to the police. In the police court on Monday the young fellow was sentenced by Magistrate Primrose to six weeks' imprisonment in the Provincial Jail.

### Balloting on Poultry.

The first opportunity for agricultural producers to declare themselves concerning the Natural Products Marketing Act is in connection with poultry. A vote among producers of poultry and poultry products is being recorded this week, ending Sat. the 23d: the vote being recorded by ballot thru the P.O. All farmers with flocks of 25 should vote.

### Auction Sales.

Auctioneer Zucht announces the holding of a sale for Mr Giese Feb. 22; and a sale for Mr John Ducholke on March 5th; and a monster clearance sale for Edwin Hoffman, who is giving up farming in this district. Ed Hoffman's sale is Friday March 8.

### Official Auditors.

The 1935 official auditors for the Stony Plain and nearby districts are: Joe Best, J Eatock, Rev Emil Berhardt, Jas Malloch, E Finchbeck, Paul Werner, E Willet, F Cormack.

## HARDWICK'S

THE HOUSE OF QUALITY.

### SPRING DRESSES, FROM THE EAST.

Just arrived; showing the new style creations in quality silk crepe dresses, for afternoon or evening wear, in regulation lengths. Colors, Mandarin Green, Dragon Red, Pekin Blue, Rose, Coolie Blue, Chinese Red, Yacht Blue, Bermuda; sizes 14 to 20 years. Each \$3.95.

### Gay English Prints.

Widths 25-26 inches; guaranteed sun and tub fast; much superior in quality and finish to Patsy and Paramount. While the quantity lasts, Special at 2 yards for 25c.

### Beautiful Foundation Garments.

For medium or stout figures; length about 21 inches at side; made of pink striped coutil and good heavy elastic inserts; 4 garters; Sizes 30 to 38. \$1.00

### Fine Count Lawn Handkerchiefs.

with neat colored Peco edge; regular value is much higher. While they last, each, 5c.

### Low Waist Girdles at a Popular Price.

With 4 hose supporters front steel 7 inches, and back steel 11 inches; sizes 24 to 32. Sale price, per pair \$1.00.

## Get It at HARDWICK'S.

### Beware The Danger Spots

The inauguration throughout Canada of new social services, and the extension of social services already existing, are policies to which it is now clear all political parties in Parliament are definitely committed. Since the beginning of the present century there has been a steady growth, not only in Canada but in all countries in the number and scope of these services of a social character, and it is now evident that the people of this Dominion are in favor of more and still larger and comprehensive services of this character.

This development is in line with modern trends and the new conception that all the people are responsible for the welfare of each individual citizen. We refer to this as a new conception, yet it is as old as civilization itself. Man is his brother's keeper and if and when man fails to discharge that responsibility to his fellowmen, then the very civilization which protects him will collapse. So it is that the great majority of people will be found to welcome the introduction and enlargement of a national programme of social services.

There are, however, one or two danger spots in connection with such a programme which the Canadian people will be well advised to recognize at the outset. These services are designed to be helpful to us as individuals and as a nation; let us therefore beware that they do not actually prove harmful.

The first danger to avoid is, that in our enthusiasm and commendable desire to provide social services, and to establish them upon a generous scale, we do not overdo it, and embark upon programmes which may prove to be beyond the financial capacity of the Canadian people to maintain. Social services such as old age pensions, mother's allowances, unemployment insurance, free medical services, etc., will cost an enormous amount of money annually. Some of these services are already costing the Federal and Provincial Governments many millions of dollars, but present expenditures are undoubtedly small in comparison with the cost of proposals now being advanced.

Each and every one of these social services can be provided and made possible by just one method, and that is taxation. That is, the community as a whole must through the payment of taxes provide the money which will be distributed through one social service or another to the people who are in need of such service. If fifty million dollars are required for, say the payment of old age pensions throughout Canada, then taxes which will yield fifty million in revenue to the government must be imposed and paid by the people. There is no other way. This fact must be recognized, together with the further fact that there is a limit beyond which people cannot pay taxes, and any social or other service which depends upon government taxes beyond that limit will find itself in difficulty.

Once established, experience has proven that these social services grow very rapidly and that expenditures largely increase. This experience indicates a second danger spot. It is this: So long as individual man and woman are required to look out for themselves and plan for their future, they will, as a rule, work, exercise some degree of thrift, and save against sickness and old age. In a word, self preservation will be one of the guiding rules of their life. But once it becomes an accepted and established fact that people will be provided for whether they are at work or not, that the community will care for them and all their ills if and when sick, and that the community will support them throughout their old age and bury them when they die, then there is grave danger that the incentive which is now the great driving force in our human nature will become less keen, weaken and gradually die.

### DON'T RISK BAKING FAILURES . . .

"YOU CAN'T BAKE GOOD  
CAKE WITH INFERIOR  
BAKING POWDER. I INSIST  
ON MAGIC. LESS THAN 1¢  
WORTH MAKES A BIG CAKE."

1929 MADAME R. LACROIX,  
Assistant Director of the Pro-  
fessional School of Domestic Sci-  
ence, Montreal.

Canada's best known Cookery Experts and Dietitians warn against trusting good ingredients to poor-quality baking powder. They advise MAGIC Baking Powder for sure results!  
CONTAINS NO ALUM—This statement on every tin is the proof. Guarantees that Magic Baking Powder is free from alum of any harmful ingredient. Made in Canada.

### Champion Bricklayer

Philip Lancaster, 24-year-old foreman in a brickyard at Hull, England, lays claim to the title of being the world's champion bricklayer. He laid 3,000 bricks in four hours, a record, he says. In the first hour he laid 908, a little better than 15 a minute.

### HE FELT MISERABLE AFTER MEALS

#### Acute Indigestion Relieved by Kruschen

The treatment which put this man right must surely be worth trying in every case of indigestion. Read what he says:—

"Two years ago I suffered very much from indigestion, loss of appetite, and a most severe pain in my back. Food poured in my stomach. I felt most miserable after meals, and had no desire or appetite for them. A friend advised me to try Kruschen Salts. I did so, and I am most happy to testify that after a short time I felt the greatest relief. I continued taking Kruschen till I felt myself quite better and a new man. I feel as 'light-hearted' as I did twenty years ago!"—W. B.

What Kruschen did for him it will do for everybody else who suffers from indigestion as he did. The fact is that "the little daily dose" of Kruschen first stimulates the flow of gastric juices to aid digestion, and then ensures a complete, regular and unflinching elimination of all waste matter every day.

### Ancient Stronghold Found

Viking Guards Did Not Allow Women In Garrison

A 1000-year-old Viking stronghold never visited by women is the discovery of Dr. Holger Arbman, who has been excavating at Sweden's ancient capital, Birka. That the Viking guards forbade women to enter this garrison is inferred because no single scrap of a woman's ornaments or apparel has been found in the ruins. On the other hand, Dr. Arbman has unearthed remains of the men's arrowheads and many knives and animal bones left from the meals of the guardians.

### No Turkey At Aklavik

The Winnipeg Tribune says turkeys at Aklavik, according to a radio dispatch from the tiny ice-bound settlement, would have been valued at \$1.50 a pound—if there had been any turkeys. There weren't, so the white and native trappers at roast caribou and wild cranberries for Christmas and New Year's dinners.

W. N. U. 2088

### Little Journeys In Science

#### COSMIC RAYS

(By Gordon H. Guest, M.A.)

Glass becomes negatively charged when rubbed with catkin, but positively charged when rubbed with silk. Also, a strip of celluloid becomes negatively charged when drawn between the fingers. In order to detect and measure the electric charges on any substance scientists have devised an instrument known as the electro-scope. A simple type of electro-scope consists of a bottle with a paraffin stopper, through which runs a piece of glass tubing. Fused through the glass tube is a piece of brass or copper wire from which are suspended two strips of gold leaf. A ball made of tinfoil is attached to the other end of the wire and is, of course, outside the bottle just above the paraffin stopper. Whenever the ball is given either a negative or positive charge the leaves fly apart in proportion to the amount of the charge. A rubber comb rubbed on a cat becomes negatively charged and if the comb is placed on the tinfoil ball some of this charge is imparted to the electro-scope and the leaves will fly apart. Since the charge is negative, another negative charge will cause the leaves to spread still farther apart, whereas a positive charge will cause the leaves to fall together before again flying apart. In this way the kinds of charges may be determined. When even the best of electroscopes are charged it is observed that the gold leaves slowly come together again. This means that some electrically charged particles from the atmosphere are neutralizing the charges on the leaves. Scientists set out to discover what was causing this discharge of an electro-scope and found that it was due to certain rays which came to the earth from outer space. They are called cosmic rays.

Many attempts have been made to stop the natural leak or discharge of cosmic rays. These attempts have always failed despite the use of the most perfect insulators and the protection of the electro-scope by lead shields, several feet in thickness. These experiments suggested that there exists an unusually penetrating radiation of feeble intensity.

Scientists have carried electroscopes to points near the two poles of the earth, at the equator, and at various other latitudes. Electroscopes and similar indicating and recording devices have been sent up into the air in sounding balloons to altitudes of over 20 miles, and have been carried to altitudes of 25,000 feet by airplanes in various localities and have been taken to high mountains as well as to depths as great as 1,000 feet in lakes. All experiments show that the rays come from above the earth and so they have been called cosmic rays. Outstanding among the various investigators in this work are two American scientists, Millikan and Compton.

### Congress Demands Respect

Persons Laughing At Chilean Parliament Will Be Arrested

Laughing at the Chilean parliament is now a punishable offence. Chile's deputies were annoyed at the increasing fun which was being made of congress and their debates. They especially objected to remarks made by members of the public in the gallery and in the precincts of the parliament. At the request of the chamber of deputies, therefore, the premier has given instructions to the police to arrest any person who is heard to "take in vain the name of the honorable congress."

## Water Project Is Outlined For The Rehabilitation Of Large Drouth Areas In Western Canada

The formation, as a measure of protection against future drouth periods in the western provinces, of water districts with water available to the farmer for domestic and other uses, just as it is to the usual city householder, was suggested by T. C. Main, A.M.E.I.C., of Winnipeg, in a paper presented before the annual convention of the Engineering Institute of Canada.

Mr. Main's paper throughout dealt with the question of the conservation of water. This he considered as one of the three principal ways of assisting nature to rehabilitate the drouth area, the other two being, respectively, improved methods of cultivation and the planting of trees and hedges.

The problem, he contended, is now of more than local or provincial interest, as it is difficult to visualize a high degree of prosperity for Canada as a whole while the great agricultural area of western Canada is in its present serious condition.

He pointed out also that drouth is a potential enemy to the industry from the Rocky Mountains to Ontario, and from the international boundary to as far north as agriculture may go. "Records show," he stated, "that precipitation in general decreases from south to north in our western country. The precipitation of the land north of the North Saskatchewan river is for the most part lighter than in the south, hence, with lighter land and less precipitation, the north country is in greater danger than the south of becoming desert, once the tree growth is gone."

Although up to the present the average production of cereal products in Saskatchewan alone has been sufficient to furnish a population of 40,000,000 people with that important part of their daily ration, it would seem that the population of the prairie regions, say south of the 54th parallel, may ultimately be limited by the amount of water that can be conserved rather than by the amount of food that can be produced.

"A striking paradox in this land of plenty," he stated, "potentially one of the wealthiest countries in the world, is the present disparity in the standard of living as between urban and rural citizens. The standard of living on many farms is much too low; lower in many respects than that of the present day of Europe. The latter at least enjoy a community life, social intercourse, the aesthetic advantages of trees, streams, lakes and natural or artificial beauty in many forms. These, for the most part are denied to the denizens of our western prairies."

"Living conditions could be greatly improved by conserving surface water; by forming artificial lakes and by creating water districts to serve rural communities with that precious commodity in much the same way as urban communities are now served."

A study of precipitation and runoff data indicated that irrigation on a large scale was out of the question. "It was suggested," stated the speaker, "that an ideal arrangement would be to provide water under pressure, say along each alternate north and south, or east and west, dead allowance, in a given water district. Water would be furnished first for domestic use in the home, thus tending to raise the standard of living; secondly, it would be piped to the barn and elsewhere for the use of stock; thirdly, water would be available for any acre or two of garden, providing vegetables for home consumption and for sale, and roots for hogs, etc."

Fourthly, sufficient water should be made available for irrigating from 15 to 25 acres of hay quarter section. When the market for wheat was poor, or in the event of a periodical drouth, they (the farmers) would still have their garden truck, a few heads of stall-fed beef steers, some fat hogs, poultry, eggs, milk and cream to carry them through. Even in the event of a depression, when such produce is difficult to dispose of at a profit, they would at least have enough to eat and so would

not be a burden on other taxpayers for relief, as at present.

"The tragedy of the drouth area is not that farmers failed to produce large quantities of wheat; indeed, it was a godsend in disguise that they did not do so, as the world supply was apparently too great. The sad part is that they had nothing to eat, chiefly due to lack of water for stock and for growing vegetables for themselves, and feed for cattle, hogs and poultry. Under the system proposed above water would be available in the cities, towns and hamlets, as well as in the rural areas, and it is calculated that on the average 120 acre-feet of water per annum for each section of land would supply the rural requirements."

A number of specific projects for the formation of water districts were discussed from the point of view of their possibilities and limitations. These were studied during the course of a reconnaissance trip made by the author for the Saskatchewan government a few years ago. They included one major project and a number of smaller ones. The major project related to the holding of about 100 feet of water on a dam across the South Saskatchewan river near Riverview, developing power thereby to lift 1,000,000 acre-feet per annum into a reservoir in the Vermilion hills from where it could be discharged to Moose Jaw, Regina, Weyburn and southward to the international boundary.

As a basis for the proper study of these projects, a comprehensive report on the geology and ground water resources of the prairie provinces should be prepared. Too little is known about these resources at present, and Mr. Main considered that farmers, engineers and others were wasting a great deal of money and effort in costly experiments trying to find satisfactory ground water in various parts of the country.

In the projects outlined, of course, there was the inevitable question of cost. On this point the speaker stated, "Seventy-five per cent at least of the rural population of this vast area, with their horses and machinery, have been practically idle for several months each summer for two, three or even four years. If this power could have been utilized during that period, all the projects suggested, and many more, could have been completed, and each completed project would have added to the real wealth of the nation."

### The Summerside Fox Ranch

#### Discover Efficient Method For Control Of Parasites

A great deal of work has been done at the Experimental Fox Ranch, Summerside, P.E.I., of the Dominion Experimental Farms, in order to find efficient methods for the control of external parasites, particularly fleas and earmites. It has been found that the best means of controlling external parasite infestation is to spray the kennels, nests, and all the woodwork of the pens with kerosene oil. If this is done three times a year there is little need of using either insect powders or earmite solutions.

Further experimental work has been carried on to ascertain the time of year it is advisable to supplement the rations with vitamins A and D to counteract a rachitic condition and to produce a good growth of pups; also to obtain other information regarding the advisability of the addition of the vitamins to the rations. As the result of further experiments new information has been obtained regarding the influence of protein content of rations on the development of fur. Experiments have been conducted to ascertain if dried meat, meat meal, and fish meal could replace fresh meats during the summer months, and work is in progress to determine the iodine requirements of silver foxes in captivity.

A cheerful liar, a writer believes, is to be preferred to the absolutely reliable man who tells the truth that hurts.

### Has Become Very Popular

#### Tomato Sales Show Remarkable Increase In Ten Years

The change in public opinion with regard to the fashions in food is well exemplified by the tomato. Not so many years ago the tomato was an object of suspicion, to-day canned tomatoes and tomato products constitute the largest of Canada's canning packs. Indeed, the story of the tomato is one of the epics of Canadian trade.

Ten years ago it was one of the least important of the food commodities sent abroad by Canada. By 1927 the export of Canadian canned tomatoes rose to what is now considered a mere 300,000 pounds. In 1934 nearly 10,000,000 pounds were exported to 31 different countries, 18 of which are British. The British alone took 9,000,000 pounds Ontario, Quebec and British Columbia are the provinces in which the commercial production of tomatoes for canning purposes and fresh sale is of greatest importance. The total acreage is approximately 20,000 acres. A dependable canning demand, even though this demand varies, is also of importance to those growers producing for the fresh vegetable market. The grower, therefore, as pointed out in the agriculture situation bulletin, issued early this year, is vitally interested in both the domestic and export demand for canned tomatoes and tomato products.

### Something To Know

Legs of tables and chests soon dig into the kitchen linoleum and leave permanent marks. To prevent this, get from your neighborhood shoe repair man a strip of composition such as he used to renew worn down heels. Cut neat "heels" for your furniture, tack them on with headless nails that will swing down inside, and there will be no more scarred floors. Heavy felt will do as well as composition material, except for very heavy furniture.

## Zoning For Fertilizer Needs For Cereal Production In The Three Prairie Provinces

### War Veterans Well Treated

#### Says Canada Has Done Fairly Good Job In Caring For Ex-Soldiers

Brigadier-General Alex Ross of Yorkton, Sask., Dominion president of the Canadian Legion, told a service club at Ottawa that "Canada on the whole has done a fairly good job of caring for her ex-soldiers."

General Ross declared "what we need most to-day is a greater sense of responsibility. There should be less dependence on government assistance and more dependence on individual effort." He praised voluntary work of Australian veterans on behalf of children of soldiers who died during or after the war.

He said he would like to discourage the idea that Canada is seriously at fault in treatment of war veterans and added that at the recent biennial conference in Australia of the British Empire Service League he found no other part of the Empire had done more for its soldiers than Canada.

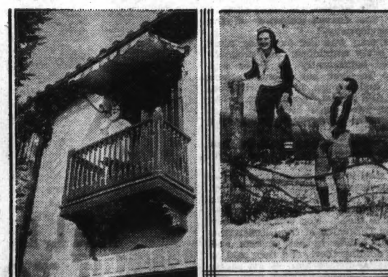

### A Wonderful Garden

#### Large Amount Of Work Being Done In Canberra, Australia

Canberra, Australia's made-to-order capital, is rapidly becoming one of the garden cities of the world. Two and three-quarter million trees and shrubs, thirty miles of hedges, and 20,000 roses have now been planted. Every tree and flower has been placed like a piece of mosaic according to the plan conceived by Walter Burley Griffin, the Chicago architect, and the walks, gardens and boulevards comprise one of the largest landscape gardening layouts ever attempted.

## The SNAPSHOT GUILD

### IS YOUR LENS CLEAN?

With a clean lens, plus proper exposure, you should always get sharp, clear pictures such as the ones above.

The Guild has received a number of letters from fellow snapshotters complaining about smudgy looking pictures. They say they know their exposures are correct and developing done carefully with fresh, clean chemicals.

Granting that all this is true, is it clean? You have looked through dirty eye-glasses with probably a few finger prints on them. If you haven't it's a bad bet that you have experienced the difficulty of looking through a smudgy window. Clean eye-glasses and camera windows give clear vision and similarly the camera cannot "see" so well if its lens (the lens) is cloudy and smudgy from grease, finger prints and dust collected over a period of months.

Cleaning a lens is a very simple operation. All you need is a soft, unperched linen handkerchief and starched a match or pencil. If the lens is quite small, the rear surface of the lens can easily be reached by removing the back of the camera. If the camera has a double lens (one front and one in front of the shutter diaphragm), the front combination may be removed by turning to the left, which will allow you to work through the shutter opening when set for "time," with the handkerchief over the end of the match or lead pencil. If the lens is quite dirty breathe on it and then rub quickly with the handkerchief. Be sure, when rubbing the front lens, to screw it back into the shutter as far as it will go.

The suggestion to work through the shutter opening also applies to cleaning the front surface of cameras with single lenses fitted to box cameras and certain folding models. Handle the lens carefully and don't exert too much pressure. It isn't necessary and might scratch the surface.

The amount of pleasure you get out of your camera depends almost entirely on how much thought and care you give it.

Pictures taken in just like golf, tennis, basketball or bowling—the more you experiment, the more thought you give your hobby, the greater your reward in self satisfaction.

There are many good books available on amateur photography but one of the latest of the press is called "How to Take Good Pictures." It is packed with sound advice for the beginner or the advanced amateur and profusely illustrated with pictures of every type, diagrams and what have you. It might be called "The Amateur Photographer's Reference Book" but don't think for one minute it is as "dry" as such a name might imply. You can no doubt purchase this book from stores that sell cameras and photographic supplies.

If you know your camera—its limitations and its versatility—give careful thought to composition and story-telling possibilities you are well along your way to take pictures as interesting and sharp as the two shown above.

JOHN VAN GUILDER

### A series of fertilizer trials, covering the grain producing portion of Manitoba, was undertaken during the years 1929, 1930, and 1931, the results of which suggest a zoning for fertilizer requirements of cereals when the "drilling-in" method is used on the Canadian prairies. The practice of drilling-in fertilizer with the seed, which has proved to be one of the most important contributions to cereal production in Western Canada, was introduced into the West in 1928 says "Scientific Agriculture."

Prior to that, commercial fertilizers were applied by the broadcast method. In the fertilizer trials, which covered nine agricultural districts, individual records were compiled and three types of response were noted: (1) to phosphate; (2) to phosphorus with smaller increases in nitrogen; (3) to both nitrogen and phosphate, with a local tendency for potash to give increased yields.

The response to nitrogen decreased from north to south, whereas phosphate gave response throughout. Potash gave no significant response in any of the prairie soils. Where increases were secured from nitrogen alone, ammonium sulfate proved superior to sodium nitrate. The three types of response coincide with the three major soil belts of the Canadian prairie, namely: (a) phosphate in the southern belt; (b) phosphorus with small amounts of nitrogen in the northern prairie region; and (c) nitrogen and phosphate in the wooded belt, with the addition of potash where required on local soils only.

### Migration Of Birds

#### Canada Goose From Jack Miner Sanctuary, Shipped To Winnipeg Last Spring

Each year Jack Miner tries a new experiment studying the migration of birds and their knowledge of travel. Last spring, with the cooperation of the Manitoba Government and the Department of Interior, Ottawa, with Mr. Carl Munro of the Hamilton Bird Society, and the Winnipeg Free Press bearing the expense of crates and express, he caught twenty-five Canada geese and shipped them via fast express to Winnipeg, where they were put with a truck and taken to Grand Lake, in that vicinity, where they were released with a flock of several thousand western wild geese.

About one month later one of these tagged geese was reported killed by a native in Northern Manitoba, near the west shore of Hudson Bay, but nothing more was heard from them until December 20th, when one was shot at Grand, North Carolina—its usual winter home. In other words, it left the western geese and went back to North Carolina, along the Atlantic seaboard, to join its parents, sisters, and brothers, where it has always spent its winters; because the geese that visit the Jack Miner bird sanctuary at Kingsville, Ontario, Canada, located 25 miles south-west of Detroit, Mich., in the spring, mostly winter along the Atlantic coast, chiefly around Carriacou Sound.

Nearly every year Jack Miner has geese killed in that vicinity, at the same town address as this bird was shot.

The report of this goose flying back to its same winter quarters, was a surprise to Jack Miner, because he believed that if they travelled nearly 1,500 miles in an express car and were released with western geese, they would follow the same western flight, and perhaps be shot west of the Mississippi.

Commenting further on it, Jack Miner said this incident is somewhat of a puzzle for scientists to carefully study in order to fathom the knowledge of this goose as to where its summer home is in the Arctic region after being released in the Northwest, and then finding its way back to its same winter quarters in North Carolina.

Now that it has been proven that these geese go back to their usual winter home, there is every possibility that some will be recaptured at the Jack Miner bird sanctuary this coming spring.

Out of 1,500 of Miner's tagged geese-killed during the last 12 years, over 99 per cent, the number in the shot card of the Mississippi. What makes the experiment doubly interesting is the veracity—give careful thought to composition and story-telling possibilities you are well along your way to take pictures as interesting and sharp as the two shown above.

## QUICKEST METHOD TO RELIEVE A COLD

1. Take 2 Aspirin Tablets.

2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 Aspirin Tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

### Follow Directions to Ease Pain and Discomfort Almost Instantly

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors everywhere today as the quick, safe, one.

Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly.

Just take Aspirin and drink plenty of water . . . every 2 to 4 hours the first day—less often afterward . . . If throat is sore, use the Aspirin gargle.

But be sure you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

### DOES NOT HARM THE HEART

### Danger On Highways

Open Road Often Tempts Motorist To Excessive Speed  
Straight stretches of rural highway vie with city street intersections as the general scene of the greatest number of Pennsylvania motor vehicle accidents, says Capitol News. Thus far this year 184 persons were killed and 7,400 were injured in 10,606 collisions at street intersections. On the open highways, where the lure of high speeds draws unwary drivers to the brink of danger the Division of Safety reports 9,051 accidents, including 502 fatal and 5,354 non-fatal have occurred.

### TELLS EXPERIENCE BEFORE A NOTARY

Mrs. Albert Aubrey, 1605 Maisonnette St., Montreal, relates in a sworn statement, how Fruit-a-Lives bettered her health. She now enjoys life after years of poor health and, so you may be sure of it, Mrs. Aubrey tells of her experience in a statement made under oath. She says,—"I was troubled for years with dizzy headaches. My bowels did not function regularly. I had no appetite. I had no sleep. It was difficult for me to do my work. I tried a great many laxatives, but found most of them too violent. Finally I started taking Fruit-a-Lives. In a very short time my health became greatly improved. I now enjoy life much more than before I learned about Fruit-a-Lives." Copy of Mrs. Aubrey's complete sworn statement will be sent on request. Write Fruit-a-Lives Ltd., Ottawa, Canada. Fruit-a-Lives—Safe and Soothe EVERYWHERE.

### SUNDAY SCHOOL LESSON FEBRUARY 24

PETER HEALS A LAME MAN

Golden Text: "But Peter said, Silver and gold have I none; but what I have, that give I thee." Acts 3:6.

Lesson: Acts 3:1 to 4:31.

Devotional Reading: Isaiah 35:1-6.

Explanations and Comments

Peter Heals a Lame Man, 3:1-10. Nine in the morning and three in the afternoon were the hours for sacrifice and prayer. It was the ninth hour, or three in the afternoon, when Peter and John went to the temple to pray.

At the temple door which was called Beautiful they saw a man sitting and begging alms of all who entered the temple. Josephus says of this door that it was adorned in a more costly manner, having much richer and thicker plates of silver and gold than the others. The man had been lame from birth, and was daily carried to that spot to beg. He must have been well known to all in Jerusalem, "he was part of the city landscape, the people knew him as they knew the carved columns of the temple doorway."

The man was not expecting alms from every worshipper, and probably glanced indifferently at Peter and John. To rivet his attention upon them and arouse his expectations, Peter said to him, "Look on us." The beggar gave heed to them. Then said Peter, "Silver and gold have I none."

Instead of silver and gold the man needed strong limbs that he might earn his own living. True charity helps men to help themselves. Peter had no money, but he had a look of sympathy, a word of hope, and he quickly added, "But what I have, that give I to thee." You recall the story told by Turgenev of a Russian who put his hands in his pockets and found nothing there, and then said to the beggar before him, "I am sorry, brother; I have nothing with me, brother." And the beggar, touched by the word "brother," said, "That, too, was a gift, brother."

In the name [by the power] of Jesus of Nazareth, walk." Peter then took the man by the right hand and raised him up. That was the secret of the cure. "It was human sympathy and human helpfulness co-operating with divine grace. The power of God just then was operating through Peter's strong right arm."

Immediately the man's feet and ankle-bones received strength. The Greek words used here for ankle-bones are said to be those which a doctor would use in describing a patient, and are one of the minute proofs that Luke the physician was the writer of The Acts. The man leaped up and began to walk, and he entered the temple with them, all the time leaping and praising God.

### Chinese Finds Quercus Spider

A spider with a human face has been discovered in Chumatin, Honan. Its body is small, but its head is abnormally large. The face is dead white, with black eyebrows and a black nose. White lips add to the horror of its appearance; its feet are dark brown. A well-to-do Chinese found the creature in his house. He has sent it to the people's educational institution.

"I received twenty proposals before I was married."

"Heavens! Wasn't your husband persistent!"

O.K. BY ME!

### Damage From Motor Boats

Causes Waves Which Are Menacing Buildings In Venice

Fears that the appearance of motor boats in the canals of Venice, Italy, would injure the buildings, have been realized. Venice is built on piles, and a committee of architects has found that the pounding of the waves made by the "put-put" boats has weakened the piling. At least \$5,000,000 will be required to repair the damage already done, and immediate action is necessary to save many beautiful buildings from collapse.

Scientists have found "regulators" of animal growth. Tests on salamanders give a clue as to why ears do not grow as big as hands.

### ARE YOU RUNDOWN, ILL?

Mrs. John Blackmon of 5 Victoria St., Stratford, Ont., said: "My health failed, I had weak and dizzy spells, had an all-gone feeling, poor digestion and was constipated. After taking Dr. Pierce's Golden Medical Discovery the stomach trouble and constipation were cured and I had no more dizzy or faint spells." New size, tabs, 50 cts.; liquid \$1.00. Write to Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

*I'll*  
**TELL YOU HOW TO COOK CAULIFLOWER**  
*without the neighbors knowing it*

Wrap it in Canapar cookery parchment. Seal in the aroma, flavor and goodness all at once. Cook your boiled or steamed FISH in Canapar. Line your roasting pan with it. It prevents fats and juices from burning and makes the meat more tender.

Canapar saves fuel . . . improves food . . . and eliminates scraping and scouring of pots and pans. You can use Canapar over and over again. It will not absorb odors. It makes a wonderful dish cloth, being silky and very tough when wet. Doesn't shed lint.

## HAUPTMANN IS SENTENCED TO DIE IN ELECTRIC CHAIR

Flemington, N.J.—Bruno Richard Hauptmann was condemned to the electric chair by the jury that tried him for the kidnap-murder of Baby Lindbergh.

White and unshaven, the German carpenter tottered slightly as he stood between his guards and heard himself ordered to "die in the electric chair."

He was sentenced to die in the week of March 15, but an almost certain appeal to the New Jersey court of appeals and errors would stay the execution. The high court is not likely to pass upon the appeal until late in May.

The jury of eight men and four women spent 11 hours and six minutes in a bare back room of the old court house where Hauptmann had been on trial since Jan. 2 before they reached their verdict.

"We find the defendant, Bruno Richard Hauptmann, guilty of murder in the first degree," intoned Foreman Charles Walton, Sr., in the deathly quiet of the littered, smoke-filled courtroom.

Anna Hauptmann, tears rolling down her cheeks as her husband went silently back to his cell, cried: "There is nothing left for me."

But she dried her eyes as she pushed through the thronged court room and left by a rear door.

"I am not afraid," she said. "I still hope."

Poiled individually at the instance of Edward J. Reilly, chief of the defense counsel, the jurors affirmed the verdict in quavering voices.

Reluctantly announced soon after the verdict was returned that he would file an appeal and carry it "to the highest court in the country."

"Although the jury has rendered a verdict on the facts in the case, we still believe that a great many errors in law have been committed, which will mean ultimately the reversal of this judgment," he said.

On the other hand, Reilly said: "The tremendous responsibility imposed upon Hunterdon county was shouldered without flinching. The nation is indebted to these courageous men and women."

## For Churchill Constituency

Hon. T. A. Crerar Is Nominated As Liberal Candidate

The Bas, Man.—Hon. T. A. Crerar, former federal cabinet minister, was nominated Liberal candidate for Churchill constituency in the forthcoming federal elections.

Nomination of Mr. Crerar came after a ballot with Dr. Daniel Baldwin, Benito, Man. Both Mr. Crerar and Dr. Baldwin spoke briefly before the vote was taken.

Mr. Crerar's first federal cabinet post was under Sir Robert Borden, prime minister of the Union government during the war-time years. He was made minister of agriculture in the administration in 1917.

He led the Progressive party a few years later, but in 1925 retired from politics.

In the cabinet shuffle of 1929 when Rt. Hon. W. L. Mackenzie King headed the Liberal administration, Mr. Crerar was summoned from private life and took the portfolio of railways.

Defeated in Brandon constituency in the general elections of 1930, Mr. Crerar retired again to private life.

**May Run In East Kootenay**  
Ottawa.—It was understood generally here that Hon. H. H. Stevens, former minister of trade and commerce, would accept nomination for the next general election in East Kootenay, the seat he now represents in the House of Commons.

**Wants Tariff Cut**

Ottawa.—A general reduction of tariffs on farm implements and primary machinery was urged in the House of Commons by Hon. Charles Stewart, former minister of the interior.

W. N. U. 2086

## Wreck Of U.S. Dirigible

Cause Of Mid-Air Collapse Remains A Mystery

San Francisco.—How the United States naval dirigible Macon reared and plunged, crazily for 35 minutes before falling and sinking to the bottom of the Pacific was revealed in the stories of its survivors.

Underlying cause of the mid-air collapse remained undetermined. Commander H. V. Wiley and others who came through safely, revealed there had been a sudden lurch at the outset, after which the great sky cruiser soared upward, out of control, then settled haphazardly to a grave in the deep.

Outwardly light-hearted, the 81 surviving officers and men who stuck with the ship until she hit the water and then got away in rubber life-boats, sang as they came ashore here.

Search was abandoned for the two missing members of the crew at the spot where the airship went down, 13 miles off Point Sur, Calif., 110 miles south of here.

Loss of the \$2,450,000 Macon left the United States Navy without a dirigible.

Hints the Macon's end, similar to that of the dirigibles Akron and Shenandoah, might mean discontinuance, or at least a curtailment, of naval development along this line were seen in Washington developments.

## Must Ease Tax Burden

W. Sanford Evans Sees Taxpayers Becoming Bankrupt

Winnipeg.—Decentralization of government in Canada had far exceeded the intentions of the fathers of confederation, declared W. Sanford Evans, Conservative leader, during debate on the throne speech in the Manitoba legislature.

Multiplicity of taxes was making taxpayers bankrupt, said Mr. Evans. The man in danger of long-life home for inability to pay the tax was still paying a wage tax, he said. He urged some steps by the government to ease the burden of taxation on the lower paid wage earners.

Mr. Evans spoke after W. J. Westwood (Lib. Prog., Carleton Place) and J. L. Christie (Lib. Prog., Cypress) respectively had moved and seconded the adoption of the address. The debate was adjourned by S. J. Farmer, newly-named Independent Labor party leader.

## Sees Japanese Menace

California Representative Says Jap Army Reserves Are On Pacific Coast

Washington.—Representative John Dockweiler, California Democrat, told the house of representatives military committee that 25,000 trained Japanese army reserves in the Pacific coast state stood ready to take up arms. Packed into Los Angeles harbor, he added, were 150 Japanese fishing boats with a cruising range of thousands of miles.

"At least they appear to be fishing boats," he said significantly. Here the chairman stopped him with word that such testimony should be given in secret session. But Dockweiler replied he intended to make the same assertions on the house floor.

## Ease Economic War

Irish Free State Makes Representations To Britain

Dublin.—A step in the direction of easing the economic "war" between the United Kingdom and the Irish Free State was revealed when President Eamon de Valera announced in the dail that representations had been made to Britain.

He referred solely to economic matters, saying the British government had been acquainted with the Irish belief that in view of the recent coal-and-cattle commercial exchange, there was a good cause for further negotiations.

**Seek Cotton Substitute**

Ottawa.—Officials of the Dominion experimental farm revealed they have supplied samples of Canadian flax for experiments being conducted in Manchester, England, in an effort to find a suitable substitute for cotton in textile manufacture.

DR. W. V. LONGLEY

Director of Extension and Professor of Farm Economics at the Nova Scotia Agricultural College, who has been elected president of the Canadian Council on Boys' and Girls' Club Work, an organization with a total membership of 27,000 in 1,544 clubs throughout Canada.

## Would Lead To Revolution

Withdrawal Of Relief Would Cause Trouble In Canada, Says Mayor McGeer

Vancouver.—Withdrawal of relief allowances by the Dominion government would lead to revolution in Canada, Mayor G. G. McGeer declared during a discussion of means to repair storm damage in Stanley park, Vancouver.

Proposals are that the work be done by the on relief lists. Ald. W. W. Smith drew attention to the fact that the present relief agreement between British Columbia and the Dominion terminates March 31.

"And there is no certainty that the government will continue relief after that date," he added.

"If it doesn't, then there will be a revolution in Canada," said Mayor McGeer.

## Honeymoon Tour

Prince George's Bride Has Slight Accident On Arrival at San Juan

San Juan, Puerto Rico.—The Duke and Duchess of Kent arrived at San Juan's airport from Port of Spain, Trinidad, in their honeymoon tour of the West Indies. A slight accident to the duchess marred the arrival. It was the first time they had touched United States territory in their tour.

Prince George's bride, the former Princess Marjia of Greece, turned her ankle while stepping on a float at the airport from the amphibian plane but was not badly hurt.

## Establishes Farm School

Forty English Children To Be Sent To School On Vancouver Island

Montreal.—Forty English children, aged seven to nine, will come to Canada in May to form the nucleus of the Fairbridge farm school on Vancouver Island, Major M. F. Trew stated here.

Major Trew will be the headmaster of the new school which is sponsored by the Child Immigration Society of Great Britain to train English boys and girls to enter farm life in Canada. He passed through Montreal en route back to England from British Columbia.

The society, he said, had bought 1,000 acres of land on Vancouver Island and building would commence shortly. Through private subscription and co-operation of the British government the children will be trained on the largest farm-school of its kind ever attempted in Canada. It will be modelled after the Fairbridge farm school of Australia. Major Trew estimated when the school is in full operation 400 boys and girls will be in residence. They will be taken from English institutions and chosen by the London committee of the society. At the age of 16 they will be sent to farms in western Canada.

## Italo-Ethiopian Trouble

Peaceful Settlement Of Border Dispute Is Expected

Rome.—Peaceful settlement of the turbulent Italo-Ethiopian border dispute in East Africa was believed by official circles in Rome to be in the offing. According to the Havas News Agency, an unconfirmed report which circulated in Rome went so far as to say that a partial accord had been reached at Addis Ababa, as a result of which Italian and Ethiopian forces had evacuated the disputed zone in the vicinity of Ualual, near the border between Italian Somaliland and Ethiopia.

## Vice-Regal Tour Of West

Edmonton.—His Excellency, the Governor-General, and Lady Beasborough, will be in Edmonton from 6:30 a.m. March 22 to 7 a.m. on March 23, during their farewell tour of the west, according to an announcement made from the office of Hon. W. L. Walsh, lieutenant-governor of Alberta. The vice-regal party will be in Calgary from 4:30 p.m. on April 11 to 5:30 p.m. April 12, as they travel east again from the coast.

## Captures Wheat Prizes

Edmonton.—John D. Morris of Hardisty, captured two wheat trophies at the provincial seed fair when judges placed the registered and certified seed exhibits. He won the Bank of Commerce championship cup for best sample of milling wheat and the trophy for best sample of registered wheat, offered by the Alberta branch of the Canadian Seed Growers' Association.

## CANADA'S FIRST SILVER DOLLAR

Here is a picture of the reverse side of Canada's first silver dollar, which will be ready for circulation on May 6th, the twenty-fifth anniversary of the accession of King George. The design is a canoe laden with poles, paddled by an Indian and a "voyageur" passing through a rocky rapids on which are two jack-pines. The word "Canada" is set above with northern lights, and below, the word "dollar" appears with the year "1935". The obverse side of the dollar will carry a crowned effigy of His Majesty, with the inscription, "Georgius V. Rex Imperator, Anno Regni XXV." The design was executed by Emanuel Hahn, R.C.A.

## SUGGEST MEANS TO LESSEN DEATH TOLL ON HIGHWAYS

Ottawa.—Longer jail terms for negligent drivers who kill and maim on the public highways will not stop the mounting toll of automobile crash. Minister of Justice Hugh Guthrie advised the House of Commons. Urged by T. L. Church (Cons., Toronto East) to stiffen the penalties for drivers responsible for highway slaughters, he said education was the only possible means of inducing safe driving.

For two hours the house discussed Canada's mounting toll of highway accidents, with the Toronto member finally withdrawing his resolution and suggesting the government institute a broad investigation as the next parliament may have sufficient material to warrant recasting the laws.

Suggestions came from all sides. They included longer jail terms, elimination of level crossings, cancellation of drivers' permits for long periods, and inclusion of women on juries trying highway cases.

"Everybody seems to have the speed bug except the House of Commons," exclaimed Toronto's wartime mayor, claiming Canada was 20 years behind the time in highway legislation. He urged a general stiffening of penalties and possibly the adaptation of New York state's homicide law for highway killings. A general survey should be made with the co-operation of the provinces and possibly a medical department of safety established at Ottawa to lead the fight.

Only by a process of education of the public, by teaching motorists to observe the courtesy of the road could any improvement take place, Mr. Guthrie believed. Increases in accidents occurred in other countries despite imposition of stricter penalties and changes in the speed limits.

Mr. Church had not suggested any definite proposals for amendments to the Criminal code.

## Flyers Finish Race

New Guinea Airmen Rather Late In Reaching Melbourne

Melbourne, Australia.—Just 116 days after they took off from Mildenhall in the England-to-Melbourne air derby, G. E. Hensworth and R. Parer, New Guinea airmen, roared across the finish line here, Feb. 18. Their belated arrival, nearly one-third of a year after the winners, was unheralded and uncheered.

The flyers took satisfaction, however, in the reflection that they had bettered one record—one they had set themselves. "We're a bit late," observed Parer, "but we've beaten our previous record by four months."

## Imperial Press Conference

Reception Tendered By Former Premier Of South Rhodesia

Bulawayo, South Africa.—Delegates to the imperial conference arrived in Bulawayo from Kimberley. Sir Herbert Stanley, governor of Southern Rhodesia, accompanied by Lady Stanley, made a special trip from Salisbury, the capital to greet them.

They met the governor and other officials at a reception tendered by H. H. Moffat, former premier of Southern Rhodesia and a nephew of David Livingstone, the noted explorer. The delegates were entertained at a banquet at night.

**Must Make Concessions**

Yarmouth, N.S.—Since Canada achieved an independent status in world affairs following the war, she can expect to be forced to make concessions as well as demands when imperial bodies meet. Prof. M. C. Dawson of the University of Saskatchewan said while addressing a local service club.

**Alberta Dairyman's Association**  
Calgary.—C. W. Burnell, Edmonton, was elected president of the Alberta Dairyman's Association at the close of the annual convention here. Fred Reynolds, Calgary, is secretary.

## Income Tax Returns

### GOVERNMENT OF ALBERTA

## IMPORTANT NOTICE

Income Tax Returns should be filed with the Superintendent of Income Tax, Qu'Appelle Building, Edmonton,

**BEFORE MARCH 31st, 1935**

Forms may be had from any Provincial Government Office, or from any bank, or direct from the Superintendent of Income Tax, Edmonton.

**All persons residing, employed, or carrying on business in Alberta, are liable to a tax on income, subject to the exemptions provided for in the Act.**

Full information re exemptions and method of filing returns is contained on the forms themselves.

Further information will be furnished on application to

## VOTING BY RADIO WITH PUSH BUTTONS

Our modern world seems to be  
growing more and more pragmatic  
each day, quotes an exchange; and  
pretty soon nothing will be per-  
mitted to remain in it that cannot  
pass the acid test of realism. For  
instance, an increasing number of  
States are now insisting that hold-  
ers of political jobs are expected to  
work at them. And before the  
world has had time to recover its  
breath along comes a new device to  
permit radio voting. This novel-  
ty is designed to be attached to  
all radios to find out the likes and  
dislikes of the owners.

By this plan each radio set will  
be equipped with 3 push buttons,  
the first marked "present," the 2nd  
"no," and the 3d "yes." Pressing  
the button marked "present" merely  
indicates to the radio station that  
you are listening to the program  
and does not mean you expect a  
gift sample of lip rouge, wall paper  
or razor blades. It has been estimat-  
ed that the entire set of buttons  
will cost about 25c; but knowing  
that Button No. 2 is likely to wear  
out before the others, they may  
possibly be supplied in gross lots  
at a reduced price.

The whole process of operating  
the radio voter is simple, says the  
inventor—when the sponsor of a  
program wishes to find out whether  
the bathos in a crooner's lower  
register is likely to incline you to  
look favorably on the sad iron, hair  
tonic or ear muf being advertised,  
all he has to do is to have his an-  
nouncer request those listening to  
the program to press the button  
marked Yes or the one marked  
No. This pressing would instantly  
be registered and totaled at the  
transmitting station.

By this method sponsors may at  
last be convinced that the public  
can actually exist without listen-  
ing to moaners astrologers, chest-  
nut retailers and patent medicine  
boosters.

It is not expected that this new  
radio voting device can be in-  
stalled thruout the country over-  
night, so that the old fashioned  
method of expressing an opinion  
by turning off the machine is like-  
ly to be continued for an indefinite  
period.

## S. P. H. FLYING TENS GET CHALLENGE FROM A TEAM GOING TO CHICAGO.

The secretary who handles  
the foreign correspondence for  
the Flyin' Tens was greatly  
surprised on opening the mail  
sack the other morning to  
find a letter from the director  
of the Lollypops, that well-  
known U.S.A. team of hockey  
players who are now on cir-  
cuit playing in the principal  
cities across the line. The  
letter indicated the Lollypops  
were headed for Chicago, and in-  
vited our local boys to meet them  
there in a game, for a side bet or  
for the gate receipts.

The offer is said to be under  
consideration.—[Contributed.]

## Tonic on a Cold Day.

Those cheerful harbingers of  
Spring, the seed catalogs, are now  
arriving to gladden the heart of  
the garden lover with promises of  
colorful blossoms and bounteous  
returns, says the Alliance Times.  
What a tonic, on a cold winter's  
day, to read of the latest wonders  
of the horticulturist's art.

## The Greatest Difference

The reason people pass one door  
to patronise another store  
is not because the busier place  
has better silks or gloves or lace,  
Or cheaper prices, but it lies  
in pleasant words and smiling  
eyes.

The greatest difference, we believe,  
is in the treatment folks receive.

## Steady Progaess.

During the last year or more no  
publication has shown more re-  
markable strides in the matter of  
increased circulation than has The  
Family Herald and Weekly Star.  
This is not strange, for it is evi-  
dent that in time of stress people  
are prone to cut down on the num-  
ber and variety of magazines and  
papers coming into their homes,  
and they find in The Family Her-  
ald and Weekly Star a paper  
which, at \$1 per year, gives them  
every variety of reading, for old  
and young, all combined in this  
one publication. Every issue over-  
flows with practical farming ideas,  
up to the minute articles, short  
stories, together with a weekly  
newspaper section which rounds  
out a feast of reading without  
compare. Truly it has been well  
said that The Family Herald and  
Weekly Star is the best for the  
leasat.

## THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail",  
"The Canyon Trail", Etc.

## CHAPTER XII.

Duro Stone summed up affairs fairly accurately as he headed for Seco. That summary included Joe Carr, Frank Crews, the Hour-glass, Dustin, Kane (whom he knew not) and . . . Edith! He grinned a little as he realized that she was not to be judged by any ordinary standards. Yet . . .

"The dirty hound. . . . He wants to marry her. . . ."

That appealed to his sense of humor and he chuckled.

"To be sensible. . . . If I can. . . . How can I blame another man for wantin' to do what I want to do myself? Dog-gone it! It makes me tired. I've spread my rope from Canada to Mexico and now I've come to the end of the trail. . . ."

Suddenly he knew that, if Edith Carr was at the end of that trail to welcome him, he wanted no other trail.

"All the same that man Dustin's a dirty hound," he muttered. "Now to try to find out what I want. . . . Here's Seco. . . ."

Seco was an ordinary cow-town with a courthouse in the middle of a square from which the rest of the town radiated. He parked in front of a small frame building that bore the sign:

SECO COURIER

Evan Jameson, Editor and Prop.

"If any information is to be had it ought to be in a newspaper office," he muttered. "If he hasn't got an encyclopedia I don't know who will have one."

A slouching man rose from a half-recumbent position across a desk and eyed him as he entered. Stone grinned affably and thrust out a hand.

"My name's Stone," he said pleasantly. "I work for Carr at the Hour-glass. Are you Mr. Jameson by any chance?"

"Not by chance, by design and for my sins I think," said Jameson with a sour grin. "What can I do for you?"

"Have you got an encyclopedia in the office and if so, will you let me consult it?"

"Over on the shelf yonder," said Jameson. "Help yourself."

He watched curiously as Stone took down volume after volume. When he replaced the last with a sigh of disappointment, Jameson became frankly curious.

"Can't you find it?" he asked.

"It's not in the book," Stone perched on the desk and rolled a cigarette. "Maybe you can help me, Mr. Jameson. Have you lived long in this part of the country?"

Jameson went to the dusty window and pointed to the great bulk of Myrant Peak that thrust above the skyline.

"When I first came here," he said, "that peak was just a hole in the ground. It's grown up since then. I haven't. You say your name's Stone? Are you the man who slapped a drink of whisky in Corse's eyes in the Silver Dollar?"

"I reckon I did," said Stone, grinning. "Sometimes I'm mighty careless where I throw my heel-taps. Why?"

"It was you, too, who had the quarrel with Sam Dustin and who dumped him into Soda Springs, hey?"

## YOUNG MOTHERS

Don't experiment with children's colds. . . . Use the proved, external method of treating colds. . . . No dosing! Just rub throat and chest with . . .

## ONE OF THE WORLD'S GREATEST ILLUSTRATED WEEK-END NEWSPAPERS

PRODUCED  
IN CANADA  
BY CANADIANS  
FOR  
CANADIANSTHE TORONTO STAR WEEKLY  
5 Sections Every Week 34 colored comics

THIS Great Canadian Illustrated Weekly—produced in Canada by Canadians—for Canadians—one of the world's greatest newspapers—is as Canadian as Hockey and quite as vigorous—with news of the world, stories and articles by world-famed writers and artists and by Canadians of international reputation. A clean, happy, youthful, illustrated newspaper. . . . 5 sections—in fact, 5 newspapers in one—every week—Entertainment—Amusement—Information for every member of the family.

Stone nodded. He wondered how and where Jameson had learned of that. Jameson enlightened him.

"My wife heard it . . . from a friend and she told me. I haven't said a word about it. I thought it beat. Maybe I can help you about that item you want in the encyclopedia," said Jameson shortly.

"First of all. . . . Do you know an old desert-rat named Kane?"

"Who? Dad Kane? Old man Shammy-skin Kane? They call him that because he always wears a shirt made of chamolais skin. He says he can use it with his mercury to try out his gold ore . . . when he finds it. Of course I know him."

"Absolutely. That is, he's perfectly honest except in mind's matters. He's queer though. Tell me what these questions mean."

Stone thrust a hand deep into his coat-pocket and kept it there while he studied Jameson. He liked what he saw and his face broke into a pleasant smile.

"I've been on the Hour-glass payroll for four months now," he said irrelevantly.

"It's a good outfit," said Jameson. "I'm sorry they've had so much hard luck. Now take Joe Carr. He's a fine old fellow but he has dropped behind in the race for money and he will never catch up. He just don't know what it's all about. He's got a good outfit, too, but a good body can't help if the head is gone. Of course he's got a good man in Frank Crews. He's not make many men like Crews."

"And Edith . . ." said Stone tentatively.

Jameson's grim face instantly lit with a light that there was no mistake. Even the silence answered Stone's half-formed question.

"Yeah," said Jameson quietly. "Edith . . . What about her?"

"Crews told me that, while Edith was out riding with me, that man Dustin came over to the Hour-glass. He saw old man Carr and told him that he wants to marry Edith. . . ."

Evan Jameson, the lanky editor of the moribund paper that certainly could not support him, threw himself across his desk and grabbed at Stone's arm.

"Tell me that again," he said earnestly. "See if I'm hearin' right." Stone told him curtly and every word sank in. Jameson nodded once or twice and seated himself on the edge of the desk.

"You listen to me," he said quietly. "You've been some months at the

Hour-glass. You must know how things are out there. . . . Stone nodded. . . . "I thought so. I've heard a lot of you. . . . From . . . Oh, from some people and what I've heard I like. . . . Wait. . . ."

He stopped Stone's attempted speech.

"I'm a married man, Stone. I've got the finest wife in the world and we've got two kids. One's a boy named for me. The other's a girl, Mabel, named for her mother. Some day when you have kids of your own, you'll understand what I'm tryin' to tell you. . . . Last year the boy was taken mighty sick while I was away. Edith Carr only knew us fairly well but she stopped her from time to time to see if she could help. Mabel. I was over at Wilton longer than I expected and I couldn't get back. The third day Sim Young came in from Seco and told me the boy was down with a bad case of diphtheria. . . . You may guess what that means in a place like Seco. Our only doctor then was a horse-doctor and he was generally full. I got back as soon as I could make it. . . . It had been a cold night and Edith Carr, hearin' how sick the boy was, spent it with Mabel. They spent that night tryin' to cook the poison out of him. . . . You know how it is. I reckon. Know anything about diphtheria?"

Stone shook his head.

"It stops up all the tubes and chokes the person to death. You've got to be right on the job. . . . Mabel was played out. . . . She was sick, too. . . . The boy was taken sick in the night an' Mabel. . . . Well,

she says frankly that she lost her nerve and didn't know what to do. . . . She stood there watchin' the boy choke to death before her eyes. . . . That's when Edith Carr came in! She saw what was takin' place. . . . She saw Mabel couldn't help herself. . . . She pushed Mabel out of the room, pulled the rubber tube off a hot-water bottle and stuck it down the kid's throat. . . . Then . . . By God, Stone. . . . She sucked it clear! Do you get that? She gave him back his life. . . . Any need to ask what we think of Edith Carr?"

There was no need. After one brief glance at Jameson, Stone knew that he could "go the limit."

"I'll tell you why I want to find old Man Kane," he said.

He perched on the desk and told Jameson of his first row with Dustin. He told him of the fight with Corse and Gray in the hills above the ranch. He told how he found old Kane's lost notebook and of the trip that took with Edith. Finally he laid on the desk the pieces of rock from the mine.

"I can get Buxton right here in town to assay 'em," said Jameson. "I'll not talk if I tell him not to. . . ."

"Well. . . . We were riding home when Dustin, who had been at the Hour-glass, came peltin' down the trail and tried to ride me down in the golpe de caballo. His horse must have slipped or something for Dustin was upset. (Jameson's eyes gleamed at that.) While he was [yin] there unconscious, I went through his pockets. I found a note from Joe Carr to Pegram of the Seco bank for eleven thousand dollars. Pegram had sold it to Dustin. Then, when I got to the Hour-glass, Crews told me that Dustin had come there to tell Carr that he wants to marry Edith. . . ."

"Well. . . .?" Jameson's voice took a tool edge. "Go on. . . ."

"Then I took the car and came here. . . ."

"To look for something in an encyclopedia," said Jameson.

Stone grinned. "You stick to the point, don't you? Look here. . . . And he laid on the littered table an envelope and the cigarette that he had taken from Dustin's pocket. He emptied the envelope on the desk and fingered the contents—three or four stubs of burned cigarettes and a little pile of brown dust. Then he picked up the whole cigarette that he had taken from Dustin."

"These are not tobacco," he said. "I found the stubs in the camp where Kane must have gone with Dustin.

. . . Or else Dustin was there alone. I don't know. I want to find Kane. This stuff may be marahuana. . . . I don't know it. I know it is not tobacco in any form. Do you know it? I was lookin' for marahuana in the book."

Jameson crumbled some of the stuff between thumb and forefinger; made a face and spat suddenly.

(To Be Continued)

## U.S. Population

Census bureau figures disclosed that the population of the United States has jumped up nearly 20,000,000 since 1930. The latest census estimate places the population at 141,574,000 people, compared with the 1930 census of 122,775,046.

## If You Eat Starches Meats, Sweets Read This

They're All Necessary Foods — But All Acid-Forming. Hence Most of Us Have "Acid Stomach" At Times. Easy Now to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion . . . brought about by too many acid-forming foods in our modern diet. And that there is now a way to relieve this . . . often in minutes.

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach."

Try this just once! Take either the familiar liquid "PHILLIPS", or, now the convenient new Phillips' Milk of Magnesia Tablets. But be sure you get Genuine "PHILLIPS".

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.

## Spruce Grove News.

S.G.H. School Club staged a whistle drive on St. Valentine's Day. Visitors were present. It was decided hearts should be trumped through the game. Members of the club brought sufficient candy to feed an army. Prizes were given. The first prize for the girls went to Clara Schwindt; for the boys, to Mr Herbert

Goebel. It seems they held the greatest number of hearts. The good weather on Wednesday brought out a large number to the ratepayers' annual meeting held yesterday in Municipal hall.

There is a report current that a new face will shortly be seen in the Grove's business section.

## THE NEWS OF STONY PLAIN AND DISTRICT.

Mr and Mrs Michael started Monday on a motor trip to Calgary.

Word received from C G Singer indicates he arrived in Vancouver all OK, after a short stop-over at Kamloops. Clarence had no difficulty in locating "Bobbie" Downs on his arrival at the Coast city.

Five sedan loads of Skoo Skiers traveled to the City on Sunday Aft. to witness the ski-jumping performances at the big slide on the South Side.

Following an interview in Edmonton on Saturday morning with P C H Primrose, P. M., Mr Ferdy Horne left in the afternoon for a bus ride down East.

The hockey game billed for Sunday did not materialize, owing to the soft ice. Fort Saskatchewan team were to have played the Seniors.

Tomorrow the 22nd is the date of the Ski Club's snow ball and novelty dance. There will be a good orchestra in attendance, and the price of admission has been set at a low notch.

An illustrated lecture will be given Monday Evg. at the United church.

The L. A. of the United church held a successful tea and sale of home cooking on the 14th.

The Flying 10s are playing what might be considered consistent hockey—they lost the game they played in the City on the 14th; and duplicated the performance with a City team at the Enders rink on Monday night.

Come to Holborn UFWA dance at Holborn hall, Friday March 1. Special music; extra good eats, and prizes. Adm. 50 cents.

Remember the Bingo party and dance by Lucknow Athletic club in the Schoolhouse Friday March 1.

**BUTTER AND EGGS WANTED** at The Royal Cafe.

## Golden Spike

Mrs Juliana Kluckas, widow of the late Louis Kluckas of Golden Spike, passed away at the residence of her son John Hennig. Golden Spike, on Tuesday, Feb. 12, aged 89 years. Deceased was one of the oldtime residents of the district.

She is survived by 4 sons John, Fred, Heinrich, Golden Spike; and Martin Hennig, Oak, Sask.

A private service was held at the residence of Mr John Hennig on Sunday, Feb. 17. Following this a public service was held in the St. John Lutheran church. Pastor P Hanneman officiating at both services.

Interment was made in the St. John cemetery.

## C. N. Train Service.

The train No. 190 leaves Jasper for Edmonton at 10 a.m. Sundays, Wed., Friday; arrive Stony Plain 8.09 p.m.

Train No. 189 leaves Edmonton 9.30 p.m. Sun., Tues., Thurs., and arrive Stony Plain 10.37 p.m.

## INGA M.C. RATEPAYERS HOLD ANNUAL MEETING

The taxpayers of Inga Municipality met in Stony Plain on Saturday last, the meeting being called to order by Returning Officer Tyrrel. Reeve Howat and all the Councillors were present.

Moved by P Sparks and H Summerfield, that Mr Partidge be the chairman to the meeting. Mr Tony Dairmont was elected secretary pro tem.

The minutes of the last annual meeting were read; and on motion of R C Howat and P Sparks, these were adopted as read.

The reading of the financial statement was the next business taken up; the various items came in for considerable discussion; and some recommendations to the new Council were moved and carried. When the last criticism had been made, and the last recommendation carried on motion of A P Anderson and P Sparks, the financial statement was finally adopted as read.

Secretary J Best explained the situation regarding a number of the vacant lots in the sub-divisions at Wabanun lake; and this led to a motion being made and carried, that Inga Council be requested to dispose of all the vacant lands in the Municipality.

Wm Katzke was present, and in an able speech advocated the opening of the road parallel to the Jasper highway, 2 miles north, giving the farmers in that sector access to the markets in their nearest towns. Regarding this, some speakers were of the opinion that this was a matter for the Provincial Highway Commissioner; while others were of the opinion that the matter should be left in the hands of Inga Council. However, a motion made by Messrs Katzke and Joe Schmigielski: That this road be opened for 6 miles west of Meridian road, failed to carry.

Another matter which evoked much discussion was a motion made by Messrs Sparks and D D Schaefer: That ratepayers be allowed to work out 25 per cent of their taxes. Before being put, the motion was amended by a rider that ratepayers be allowed to work out 50 p.c. of their tax. Several of the Councillors and others explained the difficulties which would be met if this resolution were adopted, and an effort made to put it in force. By the showing of hands, the 50 p.c. amendment carried.

Before adjourning, a motion was put and carried: That this meeting express its thanks to Secretary J Best for the able manner in which he had performed his duties throughout the year, and for his clear-cut explanation of the items in the reading of the Auditor's report.

## Thirteen Years of Progress

ON the third of February, 1922, just thirteen years ago, the first three element vacuum tube made in Canada, was manufactured in the Montreal Plant of the Northern Electric Company, Limited, and was known as the "Peanut" tube, owing to its size and low power output. There are today 140 standardized types of radio vacuum tubes produced in Canada, not to mention those used for telephone communication and other purposes.

Above, the peanut tube is shown beside a rule for comparison. The bottom picture shows H. A. Robinson, Northern Electric Radio Engineer, showing to a fair visitor one of the new 35,000 watt water cooled transmitting tubes used in Canada's newest and most powerful Broadcasting Station CBY in Winnipeg. This tube equals the combined output of more than 12,000,000 peanut tubes; which serves to illustrate the gigantic steps which science has made in the past thirteen years.

## PHOSPHATES AND CALCIUM

Are Important Minerals in Livestock Feed.

Under the heading "The 9 Mineral Supplements for Domestic Animals" Dr S R McClelland, V. R., discusses the important subject of the mineral requirements of livestock. The doctor emphasizes the importance of calcium and phosphorus as follows:

"Calcium is necessary to cause the blood to coagulate. Without lime in the blood a wounded animal would bleed to death. Calcium is needed in the process of digestion, especially in the digestion of fats.

"There is a prevalent idea that these minerals are present in all our foods in a sufficient measure and that therefore the study of this matter is not particularly important, but this idea is far from the truth.

"That calcium increases the proliacacy and has a decided influence on the progeny is a fact which cannot be disputed.

"Breeding sows will have larger, stronger litters; mares have stronger foals; and cows have calves immune to disease.

"Phosphorus is the second mineral element found in the animal body. Phosphorus in the animal body is only about 1 p.c., yet that 1 p.c. is as important to the health of the animal as the other 99 p.c.

"Phosphorus is a specific against rickets and osteomalacia (softening of the bone).
